2014

COMMUNITY-ACADEMIC  
PARTNERSHIPS FOR PACIFIC  
HEALTH EQUITY

SEPTEMBER 18-20, 2014  
AULANI, A DISNEY RESORT & SPA  
KO OLINA, HAWAI'I

## CONFERENCE OBJECTIVES

At the conclusion of the conference, the participant will be able to:

- Incorporate skills from the presentations into the care of Native Hawaiians and Pacific Islanders.
- Implement the latest scientific advances in health care disparities among Native Hawaiians and Pacific Islanders in practice.
- Implement culturally appropriate models of health care service delivery and community programs that have been effective in improving the health and wellness of Native Hawaiians and Pacific Islanders.

## TARGET AUDIENCE

This program should be of interest to physicians, physicians-in-training, social scientists, nurses and health care providers who serve Native and Pacific Peoples.

## CONTINUING MEDICAL EDUCATION

The Hawai'i Consortium for Continuing Medical Education is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Hawai'i Consortium for Continuing Medical Education designates this educational activity for a maximum of **8.75 AMA PRA Category 1 Credits™**. Physicians should only claim credit commensurate with the extent of their participation.

## COMMUNITY-ACADEMIC PARTNERSHIPS FOR PACIFIC HEALTH EQUITY

**8:30-9:00AM** CONTINENTAL BREAKFAST

**9:00AM-4:00PM** CONCURRENT WORKSHOPS I & II

### I. Community-Based Participatory Research (CBPR) Training Workshop

Community Based Participatory Research (CBPR) is defined as “a collaborative approach to research that equitably involves all partners in the research process and recognizes the unique strengths that each brings.” CBPR integrates community wisdom and scientific methods and has been used to develop effective community-based health and wellness programs to achieve social and health equity in Hawai‘i and the larger Pacific. This workshop will 1) introduce CBPR principles, benefits, and applications, especially in the context of research with indigenous communities and 2) examine the role of CBPR in influencing the social determinants of health, achieving social justice, and promoting advocacy and social change. Examples of CBPR projects in Hawai‘i and elsewhere will provide the basis for discussion.

Participants will learn:

- 1) The benefits and applications of CBPR in translational and transformative research
- 2) How CBPR has been conceived and applied by indigenous and Pacific communities to advance their own health and wellbeing
- 3) How CBPR can have a positive effect on social determinants of health and in promoting systemic change

**Seating is limited to the first 30 registered participants (for individuals from community-based organizations interested in learning about and building their capacity to engage in (CBPR).**

**Registration Fee: \$25 per person (includes workshop material, continental breakfast and boxed lunch)**

### II. Talk Story for Health: Incorporating Patient Stories into Behavioral Interventions

Narrative communication is increasingly used in health communication research and seen as an effective tool in behavior change. The purpose of this workshop is to provide participants with a step-by-step process to develop an intervention based on “talk story” defined as conversational storytelling that occurs commonly in Native Hawaiian and Pacific Islander communities. The workshop includes a brief overview of theoretical frameworks and examples of effective uses of conversational storytelling in behavior change interventions. Participants will have hands-on practice in the “talk story” intervention development process. This includes developing fundamental skills in identifying most appropriate storytellers, designing individual interview guides and producing a video. Each step is explained and modeled for participants. A discussion of the applications of narrative interventions will also be held. The workshop is convened by the Center for Health Intervention Research (CHEIR), a partnership between the University of Massachusetts Medical School in Worcester, MA and the University of Massachusetts-Boston, to develop innovative solutions to eliminate health disparities and equip the next generation of researchers to better serve vulnerable populations.

**Seating is limited to the first 25 registered participants**

**Registration Fee: \$75 per person (includes workshop material, continental breakfast and lunch)**

*Schedule subject to change without notice.*
